

English:

To whom it may concern,

With this letter, we would like to express our strong recommendation for Daan Demaecker. Daan completed an internship within our team, XR-Labs, from September 22, 2025, to January 23, 2026.

During his internship, Daan worked within our team on the development of a proof-of-concept interaction system with Non-Playable Characters (NPCs) in our XR simulator. To achieve this, he integrated several advanced technologies, including voice-to-text, a large language model (LLM), and text-to-speech. He succeeded in bringing these components together in a thoughtful and effective way. We were impressed by his strong technical insight and problem-solving abilities.

In addition to these technical skills, he also surprised us very positively in terms of collaboration and team spirit. He integrated into the team in no time, communicated clearly, and took initiative where needed. Daan's professional attitude and eagerness to learn made him a valuable addition to both our team and the project.

During his internship, Daan was also involved weekly in demonstrations for our end users. As a result, he not only gained insight into the practical application of the technology, but also developed a strong understanding of the needs and expectations of our end users. He handled their feedback constructively, which translated into improvements in his work.

We are extremely impressed by Daan, both technically and personally. We are therefore convinced that he will be a great asset to any organization he joins.

We wholeheartedly recommend him.
